Project Manager

Software & AI Developer

Digital Marketer

UI/UX Engineer

Summary

My early experience focused on UI/UX engineering, but over time I expanded into full stack development, cloud technologies, and AI through continuous learning and curiosity. With more than 8 years of experience, I have delivered scalable solutions in healthcare, real estate, and fintech. I bring a mix of design thinking and strong engineering skills to every project.

I have also spent time learning digital marketing, which improved how I think about users and business outcomes. I am certified in PMP, CSM, Azure, and hold 25 plus certifications across design, development, and cloud.

Projects & Domain Experience

Project Management 4+ Projects

Scope: Agile Delivery · Sprint Planning
· Stakeholder management · SDLC
· Product Ownership

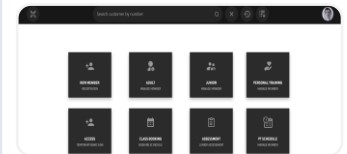

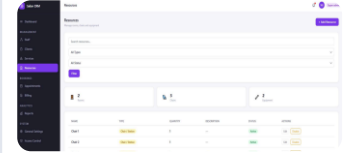

Digital Marketing 6+ Projects

Scope: Lead generation · Paid campaigns
· Funnel design · Landing pages
· Performance reporting

Software & App 13+ Projects

Scope: Web platforms · Mobile apps
· CRM tools · API integration · Cloud
Deployment · AI Agents & Chatbot

Key Highlights

- Integrated and maintained Gartner-based access control gates at FitRepublik, engineering a dual-sync architecture between local and Azure databases with automatic offline failover, ensuring uninterrupted member access at all times.
- Successfully delivered 4 projects as a dual-certified PMP and CSM, combining disciplined planning with hands-on product ownership from requirements gathering through delivery, adapting to evolving requirements without disrupting delivery.
- Migrated on-premises legacy .NET(C#) applications to Azure, configuring DevOps pipelines reducing deployment friction and improving system reliability.
- Managed ad campaign generating 1.3M impressions and 1,585 leads at \$1.74 CPL, applying certified performance marketing expertise as a Meta Certified Digital Marketer.
- Built a Python automation tool that automatically posted ads across classified websites, eliminating manual effort and significantly reducing ad-publishing time.
- Built an AI-powered SQL agent enabling natural language data querying, reducing dependency on manual SQL writing for non-technical users.
- Configured Microsoft 365, Intune for enterprise endpoint security, following CompTIA Security+ best practices to strengthen access control and device management.

Experience

Senior Software & UI Engineer

FitRepublik Fitness Center LLC - Dubai Sports City

Dec 2022 - Nov 2025

At FitRepublik, a premium fitness brand in the UAE, I served as Senior UI Engineer embedded within the product and operations team. Working closely with Sales, Coaching, Membership, and Marketing departments, I was responsible for translating business requirements into digital solutions across web and mobile platforms.

- Maintained and extended a full-stack membership management system, building new CRM features and Angular-powered reporting dashboards for sales and operations teams.
- Built mobile features for corporate partners, coach management, and parent, makeup class booking, collaborating cross-functionally with Sales, Coaching, and Membership teams.
- Integrated Gartner-based access control gates with dual-sync Azure and local database architecture, implementing automatic offline failover to ensure uninterrupted member access.

Digital Marketing Specialist

GV Properties Real Estate LLC - Business Bay

May 2019 - Dec 2022

At GV Properties, a UAE real estate agency with 30+ agents and partnerships with major developers, I managed PPC campaigns across multiple platforms and built an in-house lead management app to streamline sales operations.

- Planned and designed high-performing ad campaigns for top UAE real estate developers, producing video and artwork creatives across Snapchat, Meta, and Google Ads, and driving full-funnel lead conversion from awareness to qualified inquiry.
- Configured Microsoft 365 and Intune across the organization, configuring endpoint security, device compliance policies, and user access controls to protect company and client data.
- Built an in-house CRM with role-based access to centralize lead management, assign leads to agents, and create a sales feedback loop that improved follow-up and campaign optimization.

Front-end Developer

Alsayyad Commercials LLC - Jumeirah Lakes Towers

Nov 2017 - Feb 2019

Worked on a Magento flash sales platform handling frontend development and UI/UX, turning wireframes into interactive prototypes, also managing Zoho CRM for order & invoice tracking and handling IT support and technical operations.

- Built smart category filters and enhanced product discovery pages, reducing browsing friction and helping customers find relevant items faster during time-sensitive flash sales.
- Designed promotional landing pages and banner campaigns that supported high-traffic sale events, directly contributing to improved click-through and purchase flow.
- Configured Zoho CRM to manage customer orders, track call records, and handle invoice management, streamlining internal sales operations and improving team visibility across the customer lifecycle.

Additional Experience

- Taught JavaScript and Adobe tools at Korean Computer Institute, Karachi, managing two batches of 30+ students and earning a Letter of Appreciation for teaching excellence.
- Delivered client projects via Upwork and MENA clients by building and deploying functional application features within defined requirements and deadlines.

Project

Salon & Spa Management System

Overview

Led end-to-end delivery of a Salon & Spa CRM platform across 10 structured phases in 5 weeks. Covered full product lifecycle from discovery and architecture through development, QA, and deployment using a phased Agile methodology.

Impact & Functionality

Delivered 12+ modules including booking engine, billing, staff management, and analytics with 5 user roles and zero critical bugs at handoff. Eliminated recurring SaaS costs through a self-hosted architecture with full client data ownership.
